THE GLOBAL GOALS

The Global Goals brand is the cornerstone for all communication about the Sustainable Development Goals for 2030. The branding system is constructed as an enabler for information, engagement and collaboration. The basic system includes short names for the 17 goals, individual, colorful icons, a bright logotype, and bold typography. Our goal has been to create a positive, hopeful language that will be a constant thread through all the efforts to support the goals, strengthening the sense that we are all in this together and are working toward the same goal. Our hope is that it will inspire and help carry the promise of a better world forward.

To make the goals easy to refer to, each one has been given a short name that summarizes the main thrust of the goals. Still, we encourage everyone to read more about the targets for each goal; it's an inspiring read.

The design for The Global Goals is crisp, bold, colorful and timeless. It is designed to last for 15 years.

The main effort was to create iconography for the 17 UN goals that creates a wider understanding of the initiative. The educational aspect of The Global Goals is instrumental. We want people to know their rights, and understand that it is possible to make a better world for everyone.

In this spirit, each of the UN goals has been given a short name that summarizes the main thrust of the goals. Still, we encourage everyone to read more about the targets for each goal.

About the icons:

Every goal is very inclusive and has a subset of targets. While it is impossible to cover every aspect of the goal in a single icon, a wide range of people and organizations have agreed that they are a good representation of the essence of the goal.

About the Palette:

We are using 17 colors for the goals, and all of them are featured in the main logo for The Global Goals.

No other colors should be used for the goals, and they should preferably be shown on a white background.
